

WINTER WHEAT

Excalibur

The noble wheat!

Bearded wheat
Foot diseases: PCH1 resistant
Bread wheat A

Bearded variety. Excalibur offers first-class baking quality with excellent technological values. Fairly early active after winter, the variety ripens quickly making harvest reliable. The disease profile is strong, especially against brown rust, fusarium and septoria leaf blotch, and this is complemented with resistance to foot diseases PCH1.

AGRONOMIC CHARACTERISTICS

Alternativity	3
Stem elongation earliness	4
Heading earliness	6
Ripening earliness	7
Frost tolerance	6
Tillering capacity	6
Straw length	4
Lodging resistance	6
Chlortoluron	9
Mosaic virus	9

SOWING INFO

MID-OCTOBER

300 seeds/m²

NOVEMBER TO MID-DECEMBER

400 seeds/m²
