

WINTER WHEAT

JPS Maxy

Yield above all.

JPS Maxy is a blend of awnless wheat varieties with a maturity suited to the core of the Belgian market and a rather feed-oriented profile. The combination of varieties delivers a higher yield than the average of the component varieties in pure stand, with greater stability from season to season. The blend reduces disease risks and limits lodging, where a single variety would reach its limits.

Treated with B-UP Coating for safe emergence.

SOWING INFO

OKTOBER & NOVEMBER

300 seeds/m²

BEGIN OF DECEMBER

400 seeds/m²

- ✓ HIGHER YIELD THAN THE COMPONENT VARIETIES IN PURE STAND ✓ STABLE YIELD ON HETEROGENEOUS FIELDS
- ✓ SANITARY BENEFITS AND INCREASED LODGING RESISTANCE
