

WINTER WHEAT

Majesko

His majesty the wheat!

Bearded wheat
Bread wheat B2

Majesko, a bearded variety with an exceptional disease profile, featuring first-class resistance to Septoria leaf blotch, yellow rust and brown rust. The winter to semi-winter alternative habit and late tillering make this variety particularly suitable for early sowing. With very good tillering ability, Majesko is a safe choice that combines disease security with flexibility in farm management.

AGRONOMIC CHARACTERISTICS

Alternativity	3
Stem elongation earliness	3
Heading earliness	6
Ripening earliness	6
Frost tolerance	6
Tillering capacity	7
Straw length	3,5
Lodging resistance	6
Chlortoluron	9

SOWING INFO
