

WINTER OATS

Mont Blanc

An avalanche of oat flakes!

White color

Mont Blanc is a semi-early white winter oats, excellently adapted to European growing conditions. It combines good yield with excellent grain quality (thousand grain weight, protein content, test weight). Thanks to its robust resistance to diseases such as powdery mildew and septoria, Mont Blanc offers a reliable and versatile crop choice.

AGRONOMIC CHARACTERISTICS

Alternativity	5
Stem elongation earliness	3
Ripening earliness	6,5
Frost tolerance	7
Tillering capacity	6
Straw length	4
Lodging resistance	6,5
