

WINTER TRITICALE

Rutenac

Excellent health!

Thanks to its vegetative cycle, Rutenac is extremely suitable for early sowing and colder regions. Given its good winter hardiness, tillering ability and excellent health, this variety is also recommended for sustainable agriculture or low-input farming.

AGRONOMIC CHARACTERISTICS

Alternativity	4
Stem elongation earliness	1
Ripening earliness	5,5
Frost tolerance	9
Tillering capacity	8
Straw length	6,5
Lodging resistance	6
Pre-harvest sprouting	3

SOWING INFO

OCTOBER & NOVEMBER

300 seeds/m²

DECEMBER

400 seeds/m²

✓ HIGH YIELD

✓ LOW VISCOSITY

TECHNOLOGICAL VALUES

Test weight	7/9
TKW	7/9
Viscosity	2,4/9

DISEASE TOLERANCE

Powdery mildew	8/9
Yellow rust	9/9
Scald	8/9
Brown rust	8/9
Fusarium head blight	8/9
Eyespot	4,5/9

1/9 = Very low

9/9 = Very high
