

WINTER WHEAT

Tammo

The wheat that makes an impression!

Foot diseases: PCH1 resistant
Bread wheat B1

Tammo is a wheat that makes an impression through its plant and ear height – a true visual and technical asset for livestock farmers. The grain quality is high, with a high protein content, ideal for demanding growers. Despite its robust build, Tammo is very resistant to lodging and shows good disease resistance.

AGRONOMIC CHARACTERISTICS

Alternativity	5
Stem elongation earliness	5
Heading earliness	6
Ripening earliness	5,5
Frost tolerance	8
Tillering capacity	7
Straw length	5,5
Lodging resistance	7
Chlortoluron	9
Orange wheat blossom midge	9
