

COVER CROPS

Colza cover

Promotes nitrogen supply.

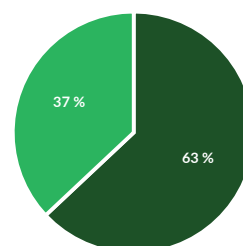

COMPOSITION

Lentils

63%

Berseem clover

37%

CHARACTERISTICS

- Prevents weeds.
- Prevents flea beetle and cabbage stem flea beetle damage immediately after emergence by disrupting the scent and visual recognition of these pest insects.
- Improves nitrogen nutrition and rapeseed performance without yield loss.
- Colza Cover freezes during winter.
- Sowing rapeseed with a legume mixture promotes nitrogen supply, prevents weeds and limits damage caused by insects such as flea beetles and weevils.
