

COVER CROPS

Energy Rogras cover

Mixture for enormous biomass production.

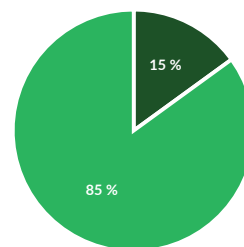

COMPOSITION

Westerwolds ryegrass

15%

Energy rye

85%

CHARACTERISTICS

- In all rotations, even with late sowing.
- Ideal nitrogen catch crop.
- Early and productive roughage.
- Leaves sufficient moisture in the soil for the following crop (maize).
- Can also be sown as green cover (catch crop).
- Lower crude ash content through use of grass.
- Both components work complementarily.
