

COVER CROPS

Horti cover

Clubroot resistant

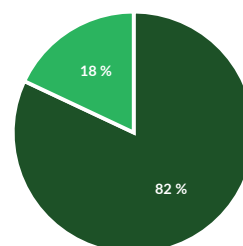

COMPOSITION

Brazilian oats

82%

Phacelia

18%

CHARACTERISTICS

- In all crop rotations (ideal in vegetable production!)
- Clubroot resistant.
- Easy to destroy.
- Phacelia is neutral to nematodes.
- Japanese oats reduce root lesion nematodes.
- CHAMPION in humus supply, EOC topper for early sowing.
- (EOC regulation: Increasing organic carbon through crop plan).
