

COVER CROPS

Maize cover

For undersowing or sowing in buffer strips.

COMPOSITION

Tall fescue

100%

USE

- Prevents nutrient leaching.
- Better soil bearing capacity and fertility.
- Grows slowly and forms dense sward.
- Meets catch crop and follow-up crop requirements within the 12-week crop rotation rule.
- Ideal for grass seed growers as no ryegrasses present.
- Pay attention during weed control.
