

Rosmar cover

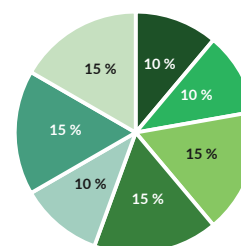

The very diverse & colorful green manure mix.

COMPOSITION

Safflower	10%
Abyssinian mustard	10%
Niger seed	15%
Phacelia	15%

Multi-resistant fodder radish	10%
Sunflower	15%
Berseem clover	15%

CHARACTERISTICS

- Fast starter with good weed suppression.
- Well-balanced mixture where each component reaches its full potential!
- Frost-sensitive mixture, as the crop becomes straw-like, allowing sun & wind easy access to the soil so the field can be worked more quickly in spring!
- Important advantage: produces virtually no seed as early flowering components are absent
- Has no overlap with main arable crops (cereals, onions, ...), contains no monocotyledons, flax, ...
- Very workable soil thanks to the presence of legumes (namely Alexandrian clover)
