

COVER CROPS

Sun cover

For more biodiversity.

COMPOSITION

Brazilian oats

70%

Phacelia

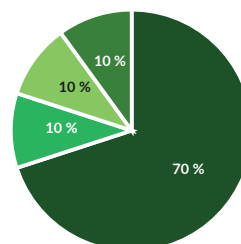

10%

Safflower

10%

Sunflower

10%

CHARACTERISTICS

- Fits in all crop rotations (even in vegetable production!)
- Fast establishment capacity, produces lots of biomass!
- Strong soil structure improvement effect. Freezes easily & easy to destroy!
- Captures residual nitrogen, phosphorus & potassium for the following crop.
- Limits erosion losses.
- Honey mixture.
- CHAMPION in humus supply, EOC topper for early sowing.
- (EOC regulation: Increasing organic carbon via crop plan).
