

Spring flowers

MP08694 - Landscape - Perennial mixtures

CHARACTERISTICS

Mixture specially formulated for autumn sowing. Sowing just before the first frost delivers an explosion of flowers from the first spring days in March.

Tip: This mixture is perfectly suited for interplanting with daffodil bulbs, giving you even earlier bloom in spring.

Plant height: 15-40 cm

Flowering:

March - June, mow in July

New flowering at the end of summer - beginning of autumn

Composed of 8 annual and 14 perennial species.
