

Super dwarf flowers

MP20179 - Specific - Soil & location

CHARACTERISTICS

Ultra short mixture, ideal for the establishment of technical zones, such as ground cover in specific situations (cemeteries, Non-Treated Zones, ...).

Mixture composed of annual and perennial plants, designed to establish over multiple years. Sown in spring, it will be decorative from summer onwards thanks to the annual plants it contains. Sown in autumn, the perennial plants will establish before winter and flower from the following spring.

Plant height: 15-30 cm

Flowering:

From summer for spring sowing

From spring for subsequent years

Composed of 8 annual and 19 perennial species.
