

Tenerife

Lawn for drought-sensitive soils!

CHARACTERISTICS

Tenerife, lawn for drought-sensitive soils!

Mixture composed based on sod-forming tall fescue supplemented with perennial ryegrass and Kentucky bluegrass. Tall fescue has the property of rooting to more than 50 cm deep and is moreover better 'salt tolerant'.

Tenerife is ideal for sowing in extreme conditions and on light permeable soils.

Packaging :

1 kg - 3 kg - 10 kg

Sowing info :

3 kg/100 m²

March, April, May, June, September, October
