

ALFALFA

Luzernemix

The champion of protein and roughage yield per hectare

COMPOSITION

Lucerne

100%

CHARACTERISTICS

- Coated with rhizobium bacteria (Meliloti) for better nitrogen fixation.
- High yield potential (heterosis effect)
- Composed of different "Flemish" type varieties whose dormancy period is adapted to our regions:
 - Tolerance to (cold) or late frost
 - Better persistence
 - Regular production
- Very good persistence, lodging resistance, disease resistance and nematode resistance.
- High protein production & digestibility
- Excellent winter hardiness
